

# EASY FIBER DRUM RACK

In fact, a solid drum rack can contribute to a longer blowing distance

## Developed for fiber blowing

This drum rack is specifically designed for the easy spooling of fiber cable drums weighing up to 800 kg.

## Four positions

Featuring four positions and hand-operated spindle towers, it becomes easy and quick to lift drums of all sizes.

## Easy installation and maintenance

Tool-free setup with a quick setup time, drum lift, and suitability for uneven surfaces and slightly hilly terrain. Bearings made of encapsulated polymer are self-lubricating and require no maintenance.

## Easy transport

It can be easily transported and stored on a standard Euro pallet, taking up minimal space. The drum rack is both lightweight and robust.

## COMPATIBLE WITH

MiniFlow RAPID (Item No.: 101-10031)

- For microfiber and cable 3-12 mm

PowerFlow RAPID (Item No.: 101-40001)

- For cable 5.5-25 mm

MultiFlow RAPID (Item No.: 101-40002)

- For cable 5.5-32 mm

## SPECIFICATIONS

Item No.:	103-231214001
Drum diameter:	Up to 1600 mm
Max. load:	800 kg
Max. Width of Drum <sup>1</sup> :	850 mm
Drum centre hole min/max:	Ø72 - Ø130 mm
Weight <sup>1</sup> :	56 kg
Height (unfolded):	824 (+ 350 mm lift) mm
Width (unfolded):	928 mm
Diameter (unfolded):	400 mm
Height (folded):	217 mm
Width (folded):	400 mm
Diameter (folded):	1194 mm

<sup>1</sup>) with a 1200 mm standard (1400 mm and 1600 mm shafts are available as options for wider drums)

<sup>2</sup>) Weight is without options (2 x 22 kg, 1 x 12 kg)
